FIRM OVERVIEW

PBK Sports, a division of PBK, is a multi-discipline group of architects and engineers that specialize in providing expert programming, design and construction administration services specifically for sports facilities.

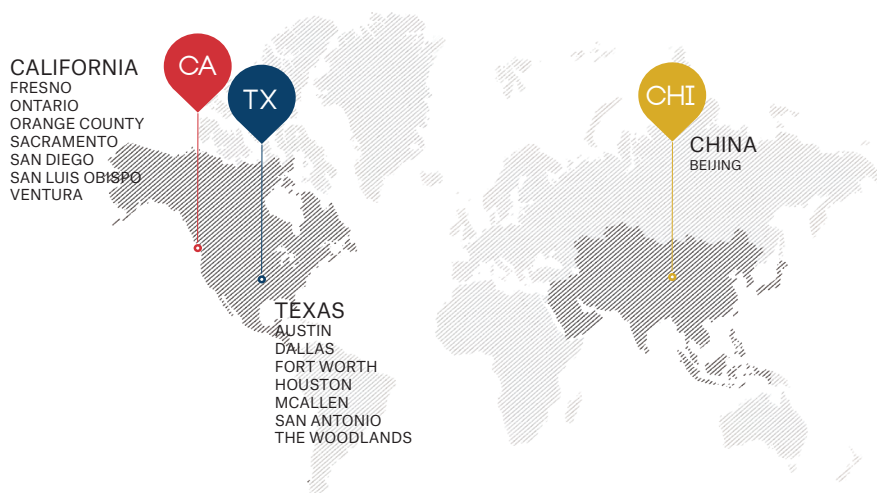

PBK Sports assumes a collaborative, team-focused approach to effectively enhance athletic performance, spectator experience, and maintain strict control over project budget and schedule. Our work is delivered with relentless customer service, backed by a proven track record of going above and beyond to ensure our clients get the best possible service on every project.

Performance Inspired Design

PBK Sports is proud to be a trailblazer in modern sports architecture. That reputation extends to our entire studio, who possess a wealth of experience designing sports facilities.

We understand the inner workings of an athletic facility and can meet the expectations of players, coaches, and fans. Regardless of a project's size or budget, we strive for robust and appealing. By elevating problem solving into an art form, we create venues that improve how athletes play, interact, heal, and learn.

We believe that listening and responding to a client's needs, rather than our own, leads to performance inspired design.

Focused Expertise

As the market adjusts to the modernization of historic venues, building owners are striving for the best use of their properties. Our team of planners and designers seek to maximize value by facilitating a collaborative programming and planning session to develop functional, economic, sports-specific solutions.

Professional Culture

The cornerstone of our business philosophy can be summed up in three words: unparalleled customer service. Every aspect of our firm – from selection of personnel, to construction administration services, is strategically aligned to respond to the specific needs of our clients. No matter how large or small the project, we ensure a world-class level of service is delivered to all.

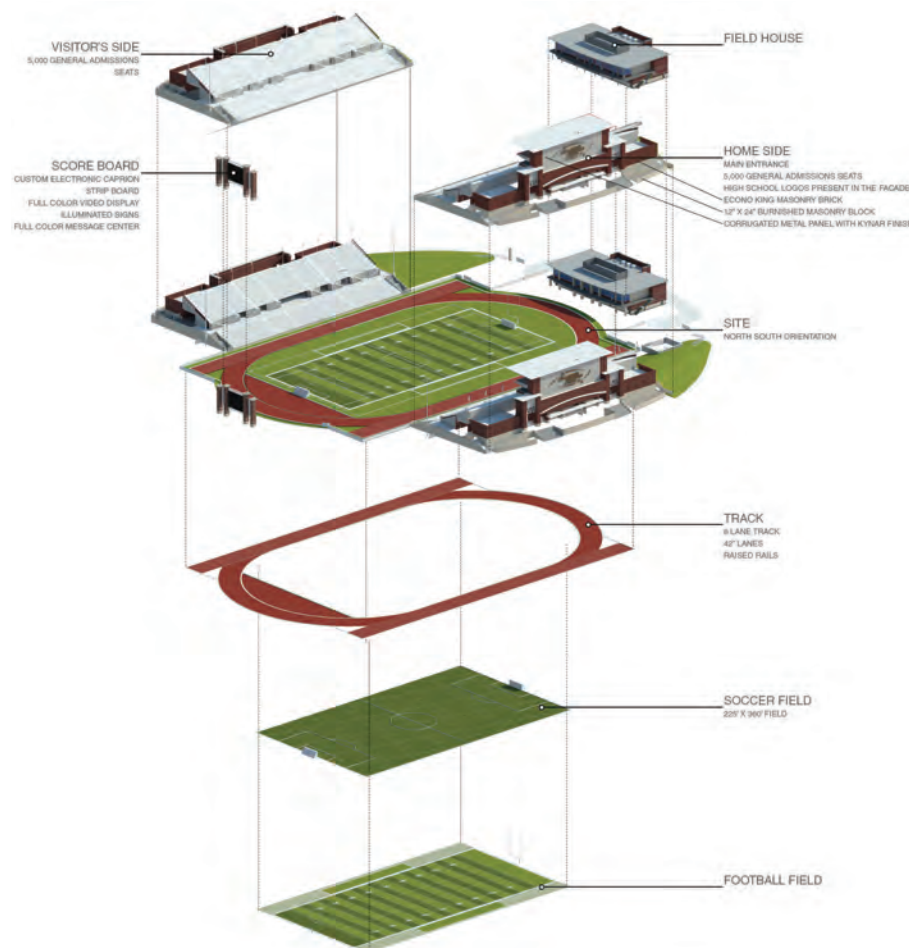

SPORTS ARCHITECTURE, ENGINEERING, PLANNING & DESIGN

HIGH PERFORMANCE SPORTS DESIGN

The design of sports facilities is driven by many quantifiable, objective factors that include functional needs, branding, schedule, evolving technologies, entertainment, food service, parking, building security and cost-effective operations. There are also less quantifiable, more subjective factors including regional influences, urban design and context, sustainable building systems, growth and change.

The diversity and depth of our experience allow us to deliver sports projects, integrating the latest in technology with artful design, creating a facility that reflects the context and function drawn from our client's goals and objectives.

I WILL RISE AGAIN

"DON'T LET THE DAY
"BE WHO YOU

"DO THINGS RIGHT"

"CHAMPIONSHIPS ARE WON BY EVERYONE CARING
AND HAVING A GREAT DAY ON THE SAME DAY"

"WHAT PRICE ARE YOU WILLING TO
PAY TO ACHIEVE YOUR DREAM?"

"HAVE A PLAN"

"WHEN YOU WANT WHAT YOU'VE NEVER
YOU MUST DO WHAT YOU'VE NEVER

HEALTH + WELLNESS

PBK Sports understands that health and wellness form an integral part to the education environment. We strive to create spaces that reflect this principal and facilitate healthy exercise and invigorated learning.

PBK Sports designs spaces and structures that consider the health and wellness of their end users from concept through construction. We firmly believe healthy environments are essential to education and sport.

Active Design

While sports facilities are plainly designed for physical activity that promotes health, PBK Sports extends this initiative to the surrounding structures and spaces. By carefully planning circulation and connectivity with the wider environment, we can craft athletic environments

that blend into their greater campuses. This design virtue also results in greater value for the client, as the spaces often double as community areas, and are thus able to be utilized by, and beneficial to, a greater number of people.

Materials and Design

PBK Sports strives to use healthy building materials wherever possible. We have on-staff sustainability experts well-versed in LEED requirements. We use sustainable products and principals, whether they be low-VOC paints and flooring, or a floor

plan or site plan that allows for the maximum of natural light to enter the space. Lighting and irrigation are also chief concerns when it comes to creating sustainable and healthful environments. The site and natural atmosphere of the location of the project also determine which sustainable decisions will be made. For instance, turf may be the 'greener' solution in one context and not in another. While many would assume that a natural grass field of play would always be the best option in this regard, turf is often much more sustainable.

CHAMPION-LEVEL PERFORMANCE

PBK Sports draws strength from our core ideology grounded not only in the successful projects, but also in the unparalleled service a client receives throughout the entire process.

***“ PBK SPORTS’ LEVEL OF PROFESSIONALISM, ATTENTION TO DETAIL AND
UNSURPASSED QUALITY OF WORK IS EQUAL TO OR BETTER THAN ANY
OTHER COMPANY WITHIN THEIR FIELD. ”***

**— RICK HALL, SENIOR ASSOCIATE DIRECTOR

STADIUMS

Stadiums are unique and highly specialized pieces of architecture in which thousands of community members assemble, united by a common purpose, competitive spirit, and entertainment.

The design is driven by many quantifiable, objective factors that include functional needs, branding, schedule, evolving technologies, entertainment, food service, parking, building security and cost-effective operations. There are also less quantifiable, more subjective factors including regional influences, urban design and context, sustainable building systems, growth and change. PBK Sports has designed landmark stadiums for clients that have been widely recognized for their innovative and significant additions to our architectural and urban landscape.

AQUATIC FACILITIES

We consistently research and create best practices that improve spectator and user experience.

Aquatic venues in the past decade have set the stage for some of the most competitive and historic athletic achievements held nationally and at the Olympic level. Our facilities have played a role in these notable moments, demonstrating performance and longevity. In these complex, delicate, and highly corrosive environments, we examine every component incorporated into these intricate structures.

MULTI-PURPOSE ARENAS

We understand the inner workings of arena design and can anticipate and meet the expectations of spectators, users, players, and coaches.

Arenas home to some of life's most compelling experiences; a place where you win the championship, graduate, experience great concerts, and hear that motivational speech. The arena is a delicate balance of art and technology, circulation and event space, services and "the experience." Form, organization, and technology come together with experience to form a winning design. We design our venues to maximize that experience for the operator, educator, athlete, coach and spectator.

MULTI-SPORT COMPLEX

Our approach to multi-sport complexes is uniquely structured to enhance spectator engagement and create a dynamic gameday experience.

PBK Sports has master planned and designed hundreds of sports complexes for every level of competition and play. We listen to our clients' vision and create multiple solutions for today and tomorrow's sports programs. We address maintenance, training programs, practice schedules, seating capacities, drainage, sports lighting, orientation and adjacencies, along with vehicular, spectator and athlete circulation. Our vast experience with different sports fields and sports surfaces allow us to bring value and best-in-class facilities.

TRACK + FIELD

Track and field planning and design demands a high level of aesthetic and function that only PBK Sports can deliver.

The design of track and field venues is a complicated and challenging proposition. To plan and design a venue that hosts multiple events in a safe and efficient manner is difficult. Complicating this task are the strict tolerances and requirements required to certify each event. At PBK Sports, we draw on our unmatched experience in the design of track and field venues to deliver a state-of-the-art design. We understand the latest trends in track and field surface technology and will work with you to find the perfect mix of design and technology.

BASEBALL + SOFTBALL

Each ball field project is custom-tailored for the institution's unique vision and functional objectives.

Famed all-American sports, baseball and softball have vastly evolved in the last decade. The technology, equipment, training techniques and turf surfaces have evolved to elicit the utmost performance from the athletes that play the sport. PBK Sports examines every possible component and design feature of ball parks to address performance, safety, training, durability and maintenance. PBK Sports designs and engineers these facilities to meet all competition level requirements, as well as those of public entities. We incorporate amenities, vision, site conditions and natural elements to produce unique and exceptional ball parks with state-of-the-art training facilities and the best home field advantage.

HOUSTON COUGARS FOOTBALL

INDOOR PRACTICE FACILITIES

Indoor practice facilities serve a multitude of uses. PBK Sports knows how to program and design a facility that is flexible and adapts to multiple uses.

Indoor practice facilities are great training facilities for multi-sports, pregame functions, community programs and youth sports. The ability to assemble and train inside a climate-controlled facility permits multiple groups to run their programs indoors during inclement weather. The common details prioritized in these facilities include synthetic turf, running tracks, cameras and video playback capabilities, music and replication of true spectator noise, football passing and line drills areas, field goal kicking, batting cages, separation curtains and other requested features.

OUTDOOR TENNIS & VOLLEYBALL COMPLEXES

PBK Sports knows what it takes to create the perfect outdoor tennis and beach volleyball complexes for durability, performance and design.

Outdoor tennis and beach volleyball are popular international sports, and both continue to grow in diverse areas and competition within the United States. PBK Sports has completed a vast number of outdoor tennis and beach volleyball courts, including unique specifications, propelling our team as experts in the design and engineering of these facilities and court surfaces. Our engineers analyze subgrade site conditions and regional weather conditions to engineer outdoor surfaces and centers to achieve our client's specifications, durability and performance.

PERFORMANCE CENTERS

PBK Sports specializes in performance centers that create a student-centric social and educational hub, merging multiple programs into one streamlined space.

Performance centers have evolved to become instrumental in the development of any athlete. Globally, these facilities have become the standard for top programs around the country. The center also plays a pivotal role in the health and wellness education of the student body. The versatility of the center is invaluable to any campus and with the addition of new technology, international sports, trends and amenities has transformed these buildings to become larger, programmed buildings and must be master planned for future activities and expansion.

SPORTS SURFACES

PBK Sports designs every conceivable type of sports surface to serve every type of event, competition, or celebration.

PBK Sports designs tracks and fields to meet clients' expectations of durability, maintenance, and athletic performance. Our unmatched level of expertise stems from our extensive number of sports surfaces. The innovations in design and engineering are unique and have been refined through years of extensive practice with all-specific subsurface site conditions, venues and budgets. Our reputation of quality, service and quantity of constructed sports surfaces has established a distinct respect for PBK Sports engineering in all sport markets.

SOCCER COMPLEX

PBK Sports is well-versed in creating a synergistic experience between team and spectator, delivering a design that truly creates an electric atmosphere for every gameday experience.

Soccer has grown in popularity in the United States, in both small and large communities, suburbs, collegiate arenas and at the professional level. PBK Sports has the expertise to engineer fields with natural or synthetic turf for soccer in multiple venues. They have been designed to meet our client's unique specifications for maintenance, durability and performance.

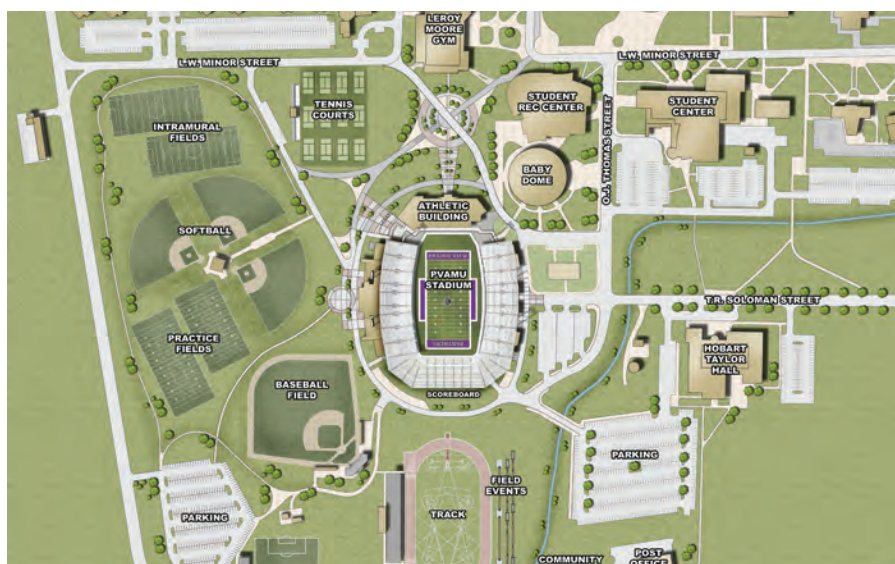

MASTER PLANNING

PBK Sports takes a partnership position in assessing long-term client needs and strives to deliver timeless solutions.

The organization of a campus' sports venues is critical to the success of each sport and the athletic programs as a whole. Each venue has its own set of unique requirements for optimum orientation, operation and safety to ensure success. A master plan allows for the design and growth of each venue so that compromises do not have to be made in the future that limit the performance and success of your program. At PBK Sports, we use the experience gained from thousands of projects, each with unique design requirements, to plan for your future success and growth.

“BEYOND DESIGN, PBK SPORTS HAS CONTINUED TO OFFER PERSONAL ATTENTION AT A LEVEL THAT HAS OPENED OUR EYES TO HOW AN ARCHITECTURE FIRM SHOULD REALLY PERFORM.”

SPORTS INTERIORS

PBK believes the interior design of sports facilities must be an integral part of a total design commitment, extending from compatibility with the overall exterior environment and architecture to coordination of graphics, signage, artwork, furniture, color selection, materials and detailing. In every case, the goal is to provide interior design services to create functional, distinctive, and cohesive interior environments.

Our team assists sports organizations in planning for and managing change by integrating people, information, land and buildings, technology and capital assets throughout the full life cycle of sports facilities.

We create spaces that work, energize, and encourage athletes, staff and spectators. The dynamic blending of color, graphics, technology and spatial experiences to inspire and motivate — that is PBK Sports interiors.

GRAPHICS + BRANDING

Sports facilities take on an identity—a life on their own—when color, lighting, 2D and 3D elements and creative graphics are infused in buildings, in halls, within spaces, creating a feast for the eyes!

The energy and excitement that is created from athletic competition and spirit is communicated through the creations of our designers in the development of branding opportunities and graphics throughout our sports facilities. Our designers look to inspire, motivate, and create dynamic environments featuring team identity expressed through color, mascots, graphics and wayfinding. Our designers meet with our clients to develop vision, image and recruit paths to enhance the athletic training and competitive environments.
